

COLLEGE OF
Education

Position: Graduate Teaching/Research Fellowship

Begin Date: Fall 2017

The Science and Mathematics (SMED) doctoral program in the School of Teaching and Curriculum Leadership (STCL) at **Oklahoma State University** fosters the insights and skills needed to deal with the most pressing challenges facing the education profession. We prepare teachers and researchers to serve in professional positions in universities, research agencies, policy agencies and schools. Our program is highly regarded by deans and professors throughout the region and nation. Doctoral students in our program are essential partners in developing new knowledge and in preparing the next generation of mathematics and science educators.

The SMED program seeks to appoint two full-time PhD students (ideally one in mathematics and one in science) with a four-year fellowship. The fellowship will include the following:

- Appointment to teach one course per semester and work as a graduate research assistant
- \$25,000 in salary with graduate student benefits
- Graduate student tuition waiver for up to 6 hours per fall/spring and 3 hours per summer
- Other funding for travel support and dissertation research support may be available
- Additional summer teaching/research opportunities are possible.

Individuals interested in pursuing this fellowship should apply to the Ph.D. program in Education with an option in either mathematics education or science education. Please apply for the doctoral program at <https://gradcollege.okstate.edu/apply>. The proposed major is Education; the degree sought is Ph.D.; and the specialization within major will be either mathematics education or science education.

The following additional materials are required to be submitted digitally via email:

- A letter of intent that includes a statement of research interest and how your research interests align with the research conducted by a particular faculty member (or faculty members) in our department (2-3 pages).
- Three letters of recommendation (these can be the same as those submitted with the application).

While the online application indicates a deadline of January 15 for a Fall start date, SMED faculty will be reviewing applications during spring 2017 until the two fellowships have been filled. Review of program applications and the additional materials required for the Graduate Teaching/Research Fellowship will begin on March 21, 2016. Please send additional materials and refer any questions to **Dr. Juliana Utley, Associate Professor Mathematics Education, Morsani Chair in Mathematics and Science Education**, juliana.utley@okstate.edu, 405-744-8111. More information about our program and faculty can be found at <https://education.okstate.edu/smed>
